

## FALKE TRAVEL & COMFORT ENERGIZING COMPRESSION

### Support effect

The ergonomically engineered pressure distribution improves the transportation of oxygen and therefore provides more energy. The return flow of blood through the veins is also improved so you feel lighter and more energised.

### Stimulates circulation

Anatomically engineered pressure distribution for improved circulation.

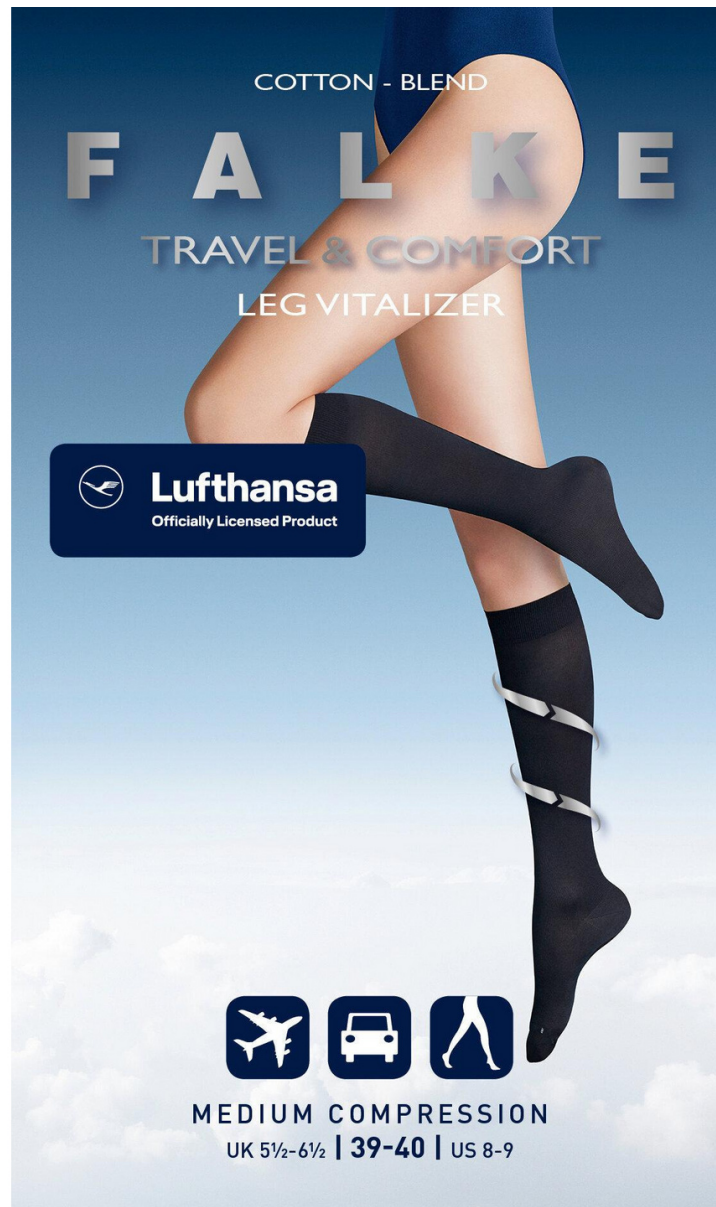

### Improved oxygenation

Promotes blood circulation and oxygen supply

These knee-high socks of the FALKE Travel & Comfort range with defined compression ensure an active stimulation and promote blood circulation in the legs, so that they feel light and carefree even during short trips, as well as during long periods of sitting, standing or walking. The natural cotton fibre content provides a stylish and elegant look. This product is defined by great wearing comfort and unrestricted freedom of movement, as well as the anatomical FALKE fit and a crease-free fit on the leg.

Official Lufthansa licensed product.
